Step 1: Find inactive sites & teams (2)

Site inactivity
Inactive site policy

This report detects sites that haven't been used for a specified period.
[Learn more about managing inactive sites](#)

Issues found
412

Recommendations

- [Download a report](#) containing a list of inactive sites and sites that don't have owners.
- Go to the [inactive site policy page](#) to create an inactive site policy and notify owners or take action.

Why do these sites require attention?
Inactive sites can become security risks if they're not regularly monitored or maintained.

How we got this number
The number of inactive sites includes classic sites, communication sites, Microsoft 365 group-connected sites, Teams-connected sites, and non group-connected team sites that have been inactive for at least three months.

Inactive site policy features

- Identify inactive sites.
- Send notifications to site owners or site admins.
- Automatically archive or mark sites as read-only.

Step 1: Find inactive sites & teams (3)

Usage reports

Analytics and reports will help you create different types of reports to get insights and information about Teams usage. These reports will help you better understand usage patterns so you make better business decisions. [Learn more](#)

2 Internal active users | 0 Active guests | 0 External active users | 10 Active channels | 0 Active shared channels | 1 Total organized meetings | 0 Posts | 0 Replies | 0 Mentions | 0 Reactions | 0 Urgent messages | 0 Channel Messages

Step 1: Find inactive sites & teams (4)

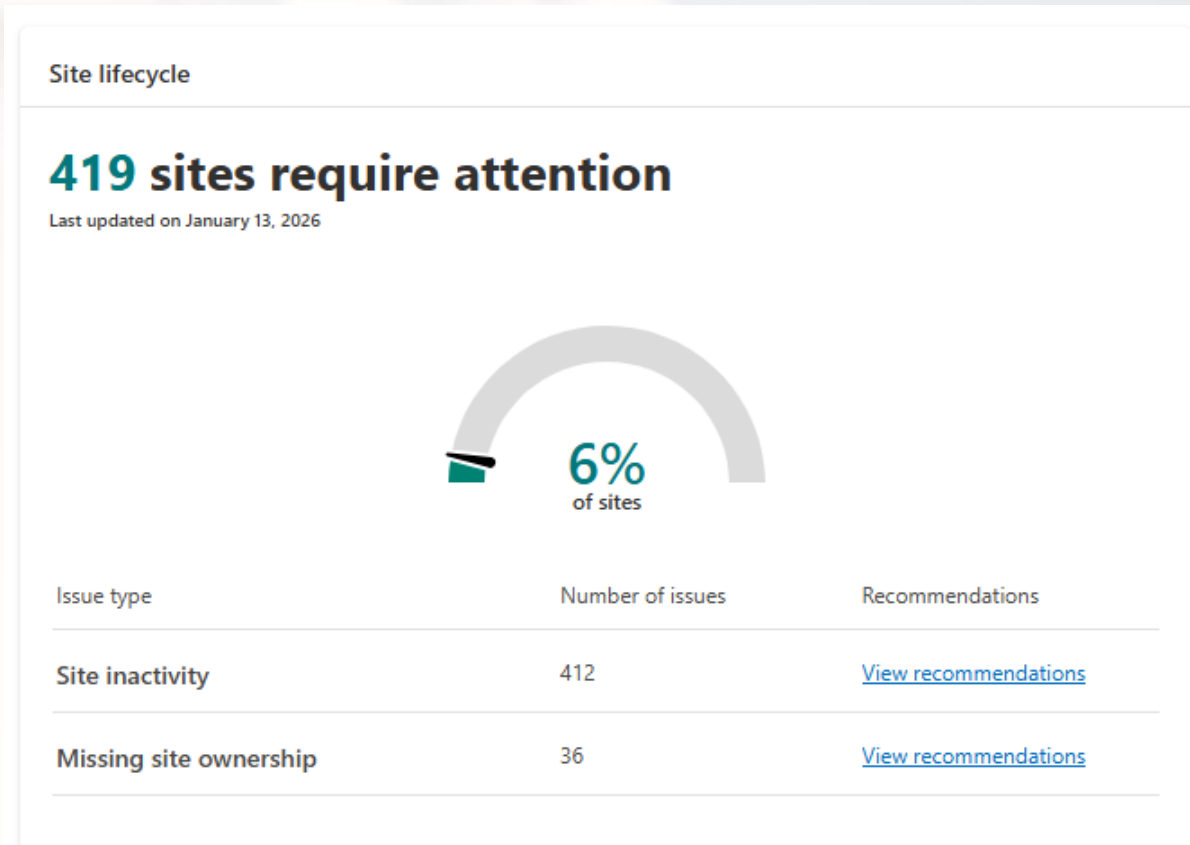

The screenshot displays the ShareGate web interface. On the left is a dark sidebar with navigation links: MIGRATION (Explore, Plan, Copy, All reports), ACTIVITY (Tasks, Scheduled), GOVERNANCE (Policies, Provisioning), and Settings (PowerShell, Protect). The main content area is titled 'All reports' and includes a sub-header 'Get a clear overview to manage your environment efficiently'. Below this, there's a section for 'My custom reports (0)' with a 'Create custom report' button. A dashed box contains a prompt: 'Looking for something specific? [Create your own custom report](#)'. The 'Built-in reports' section features a grid of 12 report cards, each with an icon, title, and brief description.

Report Title	Description
Permissions matrix report	Get a full overview of which users and groups have access to which site collections and content.
Audit report	Get a user-friendly log of all the operations performed by one or more given users on a specific target.
Site report	View crucial information (e.g. owner, size, date created, date last modified) about the sites in your source environment to help organize and streamline your migration plan.
Site collection report	Assess your environment with insights on your top-level site (e.g. site collection admin, size, date created, date last modified).
Checked out documents report	Find all checked-out files and files with no checked-in versions, and check them in before copying them so no data is left behind.
Sites with custom permissions report	View all sites which do not inherit permissions from their parent.
Unused site report	Get a list of sites which were not modified in the last 6 months that you may want to exclude from your migration, then download their content and delete them if necessary.
External user report	A comprehensive list of external users to help you keep your Microsoft 365 environment secure.
External sharing report	View and monitor all content shared outside your organization to help prevent security threats.
Orphaned user report	View all orphaned users and decide whether or not to remove them from your environment.
Lists with workflows report	View all lists with workflows to avoid losing progress while a list is being copied.
Workflow report	View all your list and site workflows.
Teams summary report	Get a full list of your teams with the following information: display name, date created, channel count, privacy and membership (owners, members and guests).
Planner plans summary report	Get information about your Planner plans including title, group name, date created, privacy, membership (owners, members and guests) and more.

Step 2: Find ownerless sites & teams (1)

Step 2: Find ownerless sites & teams (2)

Missing site ownership

Site ownership policy

This report reviews site ownership across the organization, highlighting any sites without assigned owners.

[Learn more about managing site ownership](#)

Issues found
36

Recommendations

- [Download a report](#) containing a list of inactive sites and sites that don't have owners.
- Go to the [Site ownership policy page](#) to create a site ownership policy to notify site members or take actions.

Why do these sites require attention?

Sites without owners lack content oversight, which can lead to potential security risks.

How we got this number

These sites don't have any owners.

Site ownership policy features

- Identify sites that don't meet your organization's ownership criteria.
- Send notifications to users to add new site owners or admins.
- Automatically mark sites as read-only.

Step 2: Find ownerless sites & teams (2)

PowerShell

Step 3: Find ownerless sites & teams with nonhuman owner(s)

Manage ownerless sites & teams (1)

Services Security & privacy Organization profile

Name ↑	Description
Calendar	Allow users to share their calendars with people outside of your organization.
Copilot for Sales	Manage and update Copilot for Sales settings.
Cortana	Manage Cortana data access for Windows versions 1909 and earlier and Cortana app on iOS and Android.
Directory synchronization	Sync users to the cloud using Microsoft Entra.
Dynamics 365 Applications	Allow Dynamics 365 Applications to generate insights based on user data.
Dynamics 365 Customer Voice	Choose to record the names of people who fill out surveys.
Dynamics CRM	Manage your organization's settings for Dynamics CRM.
Mail	Set up auditing, track messages, and protect email from spam and malware in the Exchange admin center.
Microsoft 365 Groups	Manage external sharing and ownerless groups.
Microsoft 365 installation options	Choose how often users get feature updates and the Microsoft 365 apps that users can install.
Microsoft 365 on the web	Let users open files stored in third-party storage services in Microsoft 365.
Microsoft Azure Information Protection	Update your settings for Microsoft Azure Information Protection.
Microsoft communication to users	Let people in your organization receive email from Microsoft about training and new features.
Microsoft Edge site lists	Set websites to open in Internet Explorer mode in Microsoft Edge, or other browser modes.
Microsoft Forms	Manage external sharing and record the names of people in your org who fill out forms.

Microsoft 365 Groups

Guests

Choose how guests from outside your organization can collaborate with your users in Microsoft 365 Groups. [Learn more about guest access to Microsoft 365 Groups](#)

- ☒ Let group owners add people outside your organization to Microsoft 365 Groups as guests
- ☒ Let guest group members access group content
If you don't select this, guests will still be listed as members of the group, but they won't receive group emails or be able to access any group content. They'll only be able to access files that were directly shared with them.

Ownerless groups

All groups must have an owner to add or remove members. Owners have unique permissions like the ability to change group settings.

- ☒ When there's no owner, email and ask active group members to become an owner

Manage ownerless sites & teams (2A)

Manage ownership of sites

This policy will:

Generate monthly reports of non-compliant sites

The policy will run monthly to identify sites that don't meet the configured minimum number of owners or admins and generate a report.

Sites excluded from policy: OneDrive, System, App catalog, Root, Home and Admin sites.

Send monthly notifications to find a site owner or admin for non-compliant sites

If a site remains non-compliant beyond 3 months, email notifications will pause for a 3-month period and then start again. This cycle will repeat until configured criteria is met or an action is enforced by policy.

Act on non-compliant sites with high potential for security risks

If a site continues to be ownerless for more than 3 months, you may choose to mark such site as read-only to avoid mismanagement of data.

- Archive or set access to read-only
- Take no action

[Learn more about managing site ownership](#)

Set policy scope

How do you want to select the sites for the policy? *

- ☐ Upload a CSV file with a list of up to 10,000 URLs
- ☒ Select sites at scale

Which site templates do you want to check the ownership status for? *

Select site templates

- ☐ Select all
- ☐ Classic sites
- ☐ Communication sites
- ☐ Group connected sites without teams
- ☐ Team sites without Microsoft 365 group
- ☐ Teams-connected sites

Manage ownerless sites & teams (2B)

Who should be responsible for each site? * ⓘ

☒ Site owners

☐ Site admins

Minimum owners or admins required for each site *

2 ▾

Who should be notified (via email) to assign or claim site responsibility? *

If a site has less than minimum owners or admins, chosen recipients will be notified. It is recommended to ensure at least 3 options are selected to increase likelihood of finding an owner.

☒ Current site owners, if any

☐ Current site admins, if any

☐ Manager of previous site owner or admin ⓘ

☐ Active site members ⓘ

[Customize email to be sent](#)

Exclude site owners or admins from receiving requests ⓘ

 Exclude users or groups

Which action do you want to take if a site remains ownerless for more than 3 months? *

Chosen action will be taken on the site if the recipients do not accept ownership or if there is no one to be notified.

ⓘ Enforcement actions cannot be edited after policy creation

☒ Do nothing

☐ Take an enforcement

Enable expiration policy (1)

The screenshot shows the Microsoft Azure portal interface for the 'Groups | Expiration' settings of a group named 'Easterfield'. The top navigation bar includes the Microsoft Azure logo, a search bar, and the Copilot icon. The left sidebar contains a navigation menu with options: Overview, All groups, Deleted groups, Diagnose and solve problems, and Settings. The 'Settings' section is expanded, showing 'General' and 'Expiration' tabs, with 'Expiration' selected. The main content area displays the expiration policy settings. It includes a description of renewal notifications, a 'Group lifetime (in days)' dropdown set to 365, an 'Email contact for groups with no owners' field containing 'jane.doe@contoso.com', and a section to 'Enable expiration for these Microsoft 365 groups' with radio buttons for 'All', 'Selected', and 'None'. The 'All' option is selected.

Email contact for groups with no owners * ⓘ jane.doe@contoso.com ✓

Enable expiration for these Microsoft 365 groups ⓘ All Selected None

Enable expiration policy (1A)

Manage inactive sites

This policy will:

Generate reports of inactive sites

Sites are included in a monthly inactive sites report if they have had no visits, edits, or file actions, and no activity on any connected resources like Microsoft Teams, Viva Engage, and Exchange within a time period that you set.

Sites excluded from policy: OneDrive, System, App catalog, Root, Home and Admin sites.

Send monthly emails to site owners or site admins

Site owners receive an email each month asking them to review their inactive sites and choose whether to keep or delete them. This email can be customized.

Act on sites that are inactive for more than 3 months

If there is no action from site owners or admins after 3 notifications, you can configure the policy to:

- Archive sites or set site access to read only
- Opt to take no action

[Learn more about managing inactive sites](#)

Set policy scope

How do you want to select the sites for the policy? *

- ☐ Upload a CSV file with a list of up to 10,000 URLs
- ☒ Select sites at scale

Which sites should be checked for inactivity? *

OneDrive sites are excluded automatically.

Select site templates

- ☐ Filter by sensitivity label
- ☐ Filter by site creation source
- ☒ Include sites with retention policies and retention holds

Exclude sites

- ☐ Exclude specific sites from this policy

Is this section helpful in setting the scope of this policy?

Enable expiration policy (1 B)

Configure policy

How long after the last activity should a site be considered inactive?

Includes activity on the site, files, and any connected resources like Microsoft Teams, Viva Engage, or Exchange.

3 months ▾

Who should be notified via email if site has been inactive? *

These users can certify the site to keep it active.

☒ Site owners

Adoption Score (2)

Set up

The set up phase is the period leading up to the meeting, including when participants join. The score includes any meeting that employs at least one recommended practice:

- Schedule meetings with at least 24 hours notice
- Share agendas and related documents ahead of time
- Try to hold meetings with high acceptance rates
- Encourage attendees to join within 5 minutes of the start time

Set up scores, across recommended practices^①

Communication shared ahead of time	17/100
Invitation accepted at a high rate (>50%)	23/100

Meet up

The meet up phase is the time attendees spend in the meeting. The score includes any meeting that employs at least one recommended practice:

- Use interactive features (hand-raising, chat, or reaction) to participate
- Encourage everyone to participate using either audio or chat
- Share visual content by turning on video or sharing screens

Meet up scores, across recommended practices^①

Used at least one interactive feature	20/100
Participated with audio or chat at a high rate (>33%)	1/100
Shared visual content	79/100

Follow up

The follow up phase is the period after the meeting. The score includes any meeting that employs at least one recommended practice:

- Record meetings for people who can't attend, and for those who want to revisit the discussion
- Send out meeting recaps or follow-up action items

Follow up scores, across recommended practices^①

Created recording	1/100
Sent out post-meeting communication	2/100

Microsoft Teams: Live transcription in Teams Rooms on Android

Archive Share Copy link Mark as unread

Summary

Microsoft Teams Rooms on Android will gain live transcription with speaker attribution, timestamps, and optional translation, requiring a Teams Rooms Pro license. Rollout starts late April 2026. Transcription is enabled by default, with no action needed, supporting accessibility and hybrid collaboration.

Is this summary helpful?  

Introduction

We're adding **live transcription capabilities** to Microsoft Teams Rooms on Android. This update allows room participants to view real-time transcription—including speaker attribution and timestamps—directly on the device. If configured, translated transcripts can also display on the front-of-room screen. This enhancement supports accessibility, hybrid collaboration, and meeting clarity. **A Teams Rooms Pro license is required.**

This message is associated with **Microsoft 365 Roadmap ID 555234**.

When this will happen

- **General Availability (Worldwide and GCCH):** Rollout begins in **late April 2026** and completes in **late May 2026**.

How this affects your organization

Who is affected

- Organizations using **Teams Rooms on Android** devices
- Only customers with **Teams Rooms Pro** licenses will receive this feature

What will happen

- Users can start transcription from the room console via **More > Record and transcribe** or **Transcribe** (based on tenant settings).

Release preferences

The screenshot shows the Microsoft 365 admin center interface. On the left, a sidebar lists various settings categories: Services, Security & privacy, and Organization profile (which is selected). Below these, a list of settings is shown, including Custom themes, Custom tiles for Apps, Data location, Help desk information, Keyboard shortcuts, Multitenant collaboration, Organization information, Release preferences (highlighted), Send email notifications from your domain, and Support integration. The main content area displays the 'Release preferences' settings. It includes a title, a brief explanation of the settings, a link to learn more about release validation, and three radio button options for how the organization receives updates.

Release preferences

Choose how your organization gets new features and service updates from Microsoft 365.

Clipchamp: Editing enhancements

Launched

This update introduces several improvements for the editing experience:

- **Silence removal:** Allows you to find, trim and delete the silent parts of audio or video files.
- **New audio tracks:** Over 200 new exclusive stock audio tracks, plus intro and outro, 30-second and 60-second versions to use as background music in your next video.
- **Other minor changes:** Adding multiple tracks to the timeline at once, item rotation on stage, and freehand editing of multiple items at once on the stage.
