Step 1: Find inactive sites & teams (2)

Site inactivity

Inactive site policy

This report detects sites that haven't been used for a specified period.
[Learn more about managing inactive sites](#)

Issues found
412

Recommendations

- [Download a report](#) containing a list of inactive sites and sites that don't have owners.
- Go to the [Inactive site policy page](#) to create an inactive site policy and notify owners or take action.

Why do these sites require attention?

Inactive sites can become security risks if they're not regularly monitored or maintained.

How we got this number

The number of inactive sites includes classic sites, communication sites, Microsoft 365 group-connected sites, Teams-connected sites, and non group-connected team sites that have been inactive for at least three months.

Inactive site policy features

- Identify inactive sites.
- Send notifications to site owners or site admins.
- Automatically archive or mark sites as read-only.

Step 1: Find inactive sites & teams (3)

Usage reports

Analytics and reports will help you create different types of reports to get insights and information about Teams usage. These reports will help you better understand usage patterns so you make better business decisions. [Learn more](#)

Get a clear overview to manage your environment efficiently

We've included some built-in reports to get you started. Create custom reports to target your specific needs.

My custom reports (0) [Create custom report](#)

Looking for something specific? [Create your own custom report](#)

Built-in reports

Permissions matrix report Get a full overview of which users and groups have access to which site collections and content.	Audit report Get a user-friendly log of all the operations performed by one or more given users on a specific target.	Site report View crucial information (e.g. owner, size, date created, date last modified) about the sites in your source environment to help organize and streamline your migration plan.
Site collection report Assess your environment with insights on your top-level site (e.g. site collection admin, size, date created, date last modified).	Checked out documents report Find all checked-out files and files with no checked-in versions, and check them in before copying them so no data is left behind.	Sites with custom permissions report View all sites which do not inherit permissions from their parent.
Unused site report Get a list of sites which were not modified in the last 6 months that you may want to exclude from your migration, then download their content and delete them if necessary.	External user report A comprehensive list of external users to help you keep your Microsoft 365 environment secure.	External sharing report View and monitor all content shared outside your organization to help prevent security threats.
Orphaned user report View all orphaned users and decide whether or not to remove them from your environment.	Lists with workflows report View all lists with workflows to avoid losing progress while a list is being copied.	Workflow report View all your list and site workflows.
Teams summary report Get a full list of your teams with the following information: display name, date created, channel count, privacy and membership (owners, members and guests).	Planner plans summary report Get information about your Planner plans including title, group name, date created, privacy, membership (owners, members and guests) and more.

Step 2: Find ownerless sites & teams (2)

Missing site ownership

Site ownership policy

This report reviews site ownership across the organization, highlighting any sites without assigned owners.

[Learn more about managing site ownership](#)

Issues found
36

Recommendations

- [Download a report](#) containing a list of inactive sites and sites that don't have owners.
- Go to the [Site ownership policy page](#) to create a site ownership policy to notify site members or take actions.

Why do these sites require attention?

Sites without owners lack content oversight, which can lead to potential security risks.

How we got this number

These sites don't have any owners.

Site ownership policy features

- Identify sites that don't meet your organization's ownership criteria.
- Send notifications to users to add new site owners or admins.
- Automatically mark sites as read-only.

Step 2: Find ownerless sites & teams (3)

PowerShell

Step 3: Find ownerless sites & teams with nonhuman owner(s)

Manage ownerless sites & teams (1)

The screenshot shows the Microsoft 365 admin center interface. On the left, a list of services is displayed, including Calendar, Copilot for Sales, Cortana, Directory synchronization, Dynamics 365 Applications, Dynamics 365 Customer Voice, Dynamics CRM, Mail, Microsoft 365 Groups, Microsoft 365 installation options, Microsoft 365 on the web, Microsoft Azure Information Protection, Microsoft communication to users, Microsoft Edge site lists, and Microsoft Forms. The 'Microsoft 365 Groups' service is selected. On the right, the configuration page for Microsoft 365 Groups is shown, featuring sections for Guests, Ownerless groups, Configuration settings, Sender, Weekly notification options, and Groups. The 'Save' button is visible at the bottom right.

Microsoft 365 Groups

Guests

Choose how guests from outside your organization can collaborate with your users in Microsoft 365 Groups. [Learn more about guest access to Microsoft 365 Groups](#)

- ☒ Let group owners add people outside your organization to Microsoft 365 Groups as guests
- ☒ Let guest group members access group content

If you don't select this, guests will still be listed as members of the group, but they won't receive group emails or be able to access any group content. They'll only be able to access files that were directly shared with them.

Ownerless groups

All groups must have an owner to add or remove members. Owners have unique permissions like the ability to change group settings.

- ☒ When there's no owner, email and ask active group members to become an owner

Configuration settings [Configure policy](#)

Manage ownerless sites & teams (2A)

Manage ownership of sites

This policy will:

Generate monthly reports of non-compliant sites

The policy will run monthly to identify sites that don't meet the configured minimum number of owners or admins and generate a report.

Sites excluded from policy: OneDrive, System, App catalog, Root, Home and Admin sites.

Send monthly notifications to find a site owner or admin for non-compliant sites

If a site remains non-compliant beyond 3 months, email notifications will pause for a 3-month period and then start again. This cycle will repeat until configured criteria is met or an action is enforced by policy.

Act on non-compliant sites with high potential for security risks

If a site continues to be ownerless for more than 3 months, you may choose to mark such site as read-only to avoid mismanagement of data.

- Archive or set access to read-only
- Take no action

[Learn more about managing site ownership](#)

Set policy scope

How do you want to select the sites for the policy? *

- ☐ Upload a CSV file with a list of up to 10,000 URLs
- ☒ Select sites at scale

Which site templates do you want to check the ownership status for? *

☐ Select all

☐ Classic sites

☐ Communication sites

☐ Group connected sites without teams

☐ Team sites without Microsoft 365 group

☐ Teams-connected sites

Manage ownerless sites & teams (2B)

Who should be responsible for each site? * ⓘ

☒ Site owners

☐ Site admins

Minimum owners or admins required for each site *

2 ▾

Who should be notified (via email) to assign or claim site responsibility? *

If a site has less than minimum owners or admins, chosen recipients will be notified. It is recommended to ensure at least 3 options are selected to increase likelihood of finding an owner.

☒ Current site owners, if any

☐ Current site admins, if any

☐ Manager of previous site owner or admin ⓘ

☐ Active site members ⓘ

[Customize email to be sent](#)

Exclude site owners or admins from receiving requests ⓘ

 Exclude users or groups

Which action do you want to take if a site remains ownerless for more than 3 months? *

Chosen action will be taken on the site if the recipients do not accept ownership or if there is no one to be notified.

ⓘ Enforcement actions cannot be edited after policy creation

☒ Do nothing

☐ Take an enforcement

Enable expiration policy (1)

The screenshot shows the Microsoft Azure portal interface for the 'Groups | Expiration' settings page. The top navigation bar includes the Microsoft Azure logo, a search bar, and the Copilot icon. The breadcrumb trail indicates the path: Home > Microsoft 365 > Groups > Groups. The page title is 'Groups | Expiration' with a sub-header 'Easterfield'. The left sidebar contains a navigation menu with 'Overview', 'All groups', 'Deleted groups', 'Diagnose and solve problems', and 'Settings'. Under 'Settings', 'General' and 'Expiration' are listed, with 'Expiration' being the active tab. The main content area includes a 'Save' button, a 'Discard' button, and a 'Got feedback?' link. A descriptive paragraph states: 'Renewal notifications are emailed to group owners 30 days, 15 days, and one day prior to group expiration. Group owners must have Exchange licenses to receive notification emails. If a group is not renewed, it is deleted along with its associated content from sources such as Outlook, SharePoint, Teams, and Power BI.' Below this, the 'Group lifetime (in days)' is set to 365. The 'Email contact for groups with no owners' field contains the email address 'jane.doe@contoso.com'. At the bottom, the 'Enable expiration for these Microsoft 365 groups' section has three radio buttons: 'All' (selected), 'Selected', and 'None'.

Enable expiration policy (1A)

Manage inactive sites

This policy will:

Generate reports of inactive sites

Sites are included in a monthly inactive sites report if they have had no visits, edits, or file actions, and no activity on any connected resources like Microsoft Teams, Viva Engage, and Exchange within a time period that you set.

Sites excluded from policy: OneDrive, System, App catalog, Root, Home and Admin sites.

Send monthly emails to site owners or site admins

Site owners receive an email each month asking them to review their inactive sites and choose whether to keep or delete them. This email can be customized.

Act on sites that are inactive for more than 3 months

If there is no action from site owners or admins after 3 notifications, you can configure the policy to:

- Archive sites or set site access to read only
- Opt to take no action

[Learn more about managing inactive sites](#)

Set policy scope

How do you want to select the sites for the policy? *

- ☐ Upload a CSV file with a list of up to 10,000 URLs
- ☒ Select sites at scale

Which sites should be checked for inactivity? *

OneDrive sites are excluded automatically.

Select site templates

- ☐ Filter by sensitivity label
- ☐ Filter by site creation source
- ☒ Include sites with retention policies and retention holds

Exclude sites

- ☐ Exclude specific sites from this policy

Is this section helpful in setting the scope of this policy?

Enable expiration policy (1B)

Configure policy

How long after the last activity should a site be considered inactive?

Includes activity on the site, files, and any connected resources like Microsoft Teams, Viva Engage, or Exchange.

3 months ▾

Who should be notified via email if site has been inactive? *

These users can certify the site to keep it active.

☒ Site owners

☐ Site admins

[Customize email to be sent](#)

Exclude site owners or admins from receiving requests ⓘ

 Exclude users or groups

What action should the policy take on inactive sites that have not been certified by site owners or site admins after 3 notifications? *

ⓘ Enforcement actions cannot be edited after policy creation

Adoption Score (2)

Set up

The set up phase is the period leading up to the meeting, including when participants join. The score includes any meeting that employs at least one recommended practice:

- Schedule meetings with at least 24 hours notice
- Share agendas and related documents ahead of time
- Try to hold meetings with high acceptance rates
- Encourage attendees to join within 5 minutes of the start time

Set up scores, across recommended practices^①

Meet up

The meet up phase is the time attendees spend in the meeting. The score includes any meeting that employs at least one recommended practice:

- Use interactive features (hand-raising, chat, or reaction) to participate
- Encourage everyone to participate using either audio or chat
- Share visual content by turning on video or sharing screens

Meet up scores, across recommended practices^①

Follow up

The follow up phase is the period after the meeting. The score includes any meeting that employs at least one recommended practice:

- Record meetings for people who can't attend, and for those who want to revisit the discussion
- Send out meeting recaps or follow-up action items

Microsoft Teams: Live transcription in Teams Rooms on Android

Archive Share Copy link Mark as unread

Summary

Microsoft Teams Rooms on Android will gain live transcription with speaker attribution, timestamps, and optional translation, requiring a Teams Rooms Pro license. Rollout starts late April 2026. Transcription is enabled by default, with no action needed, supporting accessibility and hybrid collaboration.

Introduction

We're adding **live transcription capabilities** to Microsoft Teams Rooms on Android. This update allows room participants to view real-time transcription—including speaker attribution and timestamps—directly on the device. If configured, translated transcripts can also display on the front-of-room screen. This enhancement supports accessibility, hybrid collaboration, and meeting clarity. **A Teams Rooms Pro license is required.**

This message is associated with Microsoft 365 Roadmap ID [555234](#).

When this will happen

- **General Availability (Worldwide and GCCH):** Rollout begins in **late April 2026** and completes in **late May 2026**.

How this affects your organization

Who is affected

- Organizations using **Teams Rooms on Android** devices
- **Only customers with Teams Rooms Pro licenses** will receive this feature

What will happen

- Users can start transcription from the room console via **More > Record and transcribe** or **Transcribe** (based on tenant settings).

Clipchamp: Editing enhancements

Launched

This update introduces several improvements for the editing experience:

- **Silence removal:** Allows you to find, trim and delete the silent parts of audio or video files.
- **New audio tracks:** Over 200 new exclusive stock audio tracks, plus intro and outro, 30-second and 60-second versions to use as background music in your next video.
- **Other minor changes:** Adding multiple tracks to the timeline at once, item rotation on stage, and freehand editing of multiple items at once on the stage.

Lots of free stuff out there!

The screenshot shows the Microsoft 365 Copilot resources page. At the top, there are three tabs: 'Microsoft 365 Copilot Chat', 'Microsoft 365 Copilot' (which is active and highlighted in black), and 'Agents'. Below the tabs, the word 'RESOURCES' is centered, followed by the heading 'Find the right tools'. There are two main cards: 'Copilot Success Kit' and 'Interactive Scenario Library'. The 'Copilot Success Kit' card describes how it empowers users to achieve rapid value and includes a button to 'Explore the kit'. The 'Interactive Scenario Library' card describes exploring common scenarios and includes a button to 'Get inspired'. Below these, the heading 'Choose your role' is followed by three role-based filters: 'Leadership' (selected), 'User enablement', and 'Technical readiness'. At the bottom, there are four role-based cards: 'Get ready' (with links to 'Implementation Summary Guide' and 'Responsible AI principles'), 'Onboard & engage' (with links to 'How to: It's not about AI - it's about trust' and 'Copilot Skillling Center for all roles'), 'Deliver impact' (with links to 'Copilot Dashboard overview' and 'Access the Copilot Dashboard'), and 'Extend & optimize' (with links to 'Empowering every developer with Copilot plugins' and 'Learn more about Copilot Studio').
